

# Free seminar - Approaches to tube weaning

Do you work with children who are enterally fed?

Would you like to know more about approaches to tube weaning?

This seminar will give you an opportunity to join with other health professionals to hear Professors Marguerite Dunitz-Scheer and Peter Scheer talk about their '*No Tube Feeding Program*' in Graz, Austria.

The seminar will:

- > outline the nature and extent of severe feeding problems of infancy and early childhood
- > outline techniques and interdisciplinary roles in assessment of readiness to wean young children with severe feeding difficulties
- > address tube weaning of young children with disabilities
- > focus on how to support the child and family pre and post weaning in the community.

For further information on the keynote speakers, please see [www.notube.at/team](http://www.notube.at/team)
